

Barre Chords

It's all about PRESSURE and LEVEREGE. Use of proper technique will make these much easier to play...

- Keep barring finger off of fret (just behind)
- Thumb goes in middle of the neck and is kept straight
- Fingers are curved so they don't touch the strings behind them
- Fingertips as close to fret as possible without touching

Barred E: root on 6th (low E) string

Barred A: root on 5th (A) string
